

A 200 ml glass polymer bottle in extrusion blowing.

30 octobre 10 | Parfumerie Cosmétique | #11644 :: rss

Rebhan has just developed a bottle of 200 ml glass polymer produced in extrusion blowing. 

packaging

The first one, according to the company. Using this raw material of Eastman from several years, she estimates to have acquired a good know-how concerning this material and process. This bottle has been produced for shampoo's Marins Fabre to which was previously packaged in a glass bottle. The bottle received a lacquering hydrobase and a varnish on base water. The capsule is aluminum, but the cap can also in glass polymer. This development allows the company to spread its expertise on the perfume market.
